

Q ONE PROPERTY SERVICES

TRUAMA & CRIME SCENE CLEAN UPS

Body Fluids and Potential Pathogens

POTENTIAL PATHOGENS AT THE SCENE

When servicing a trauma or crime scene clean up, the concern is the unknown source of the body fluids and potential pathogens.

Pathogens may include:

- Bacteria
- Fungi
- Viruses
- Prions

LET OUR TRAINED TEAM HELP

It is extremely important to understand the dangers that the scene may hold and that no one enters without the correct PPE.

Q One has been highly trained to ensure the site is safely decontaminated and all traces are removed leaving your site clean and livable. If the site is not clean 100% there is risk of potential pathogens that could severely harm the occupants.

- 01. ASSESS THE SITE**
- 02. APPLY PROPER EPA BIOCIDES & ODOUR CONTROL IF NEEDED**
- 03. REMOVE ANY CONTAMINATES**
- 04. RINSE WITH WATER**
- 05. RE-CLEAN WITH EPA SOLUTION & RINSE**

Unfortunately, the site may have items that are probably not cleanable such as:

- Carpet, if saturated
- Leather covered sofas

We will assess and let you know what we recommend

IF IN DOUBT, CONTACT Q ONE
